### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1, 11 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lehmann et al.(US 4,177,294) in view of Leblond (US 6,578,590).

Lehmann et al. teaches treated items including mushrooms (column 2, , line 2) with solutions which may be at pH 5-10 (column 3, line 19-21) and rinsing the items with water to wash out the cleaning preparation (column 2, lines 11-12). This rinsing step reads on the instant claims 1, 11 and 24, limitation of "rinsing with a pH neutralizing solution having a pH sufficient to return the mushrooms to the mushroom physiological pH of about 6.5".

Unlike, the claimed invention, Lehmann does not require that his water be electrolyzed. However, Leblond (US 6,578, 590) teaches sanitizing food products (column 1, lines 8-9) with means including electrolyzed water (Column 3, line 2).

Art Unit: 1764

Therefore it would have been obvious to a person having ordinary skill in the art to modify Lehmann by using electrolyzed water as taught by Leblond in order to sanitize the mushrooms.

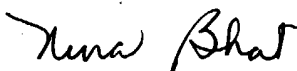

4. Claims are objected to as being dependent upon a rejected base claim 2-10, 12-23 and 25-29 but apparently free of the prior art. Claims 34-50 are apparently free of the prior art.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Bhat whose telephone number is 571-272-1397. The examiner can normally be reached on Monday-Friday, 9:30AM-6:00PM.
